BUILDING SEWER INSPECTIONS

- 5.01 Use of new connection to the sewer system will not be permitted until the installation has been inspected, tested and approved in accordance with the Authority's specifications.
- 5.02 The designated Inspector of the Authority shall be given at least twenty-four (24) hours notice of the time when such connection shall be made in order that said Inspector can be present to inspect and approve the work of connection. The Inspector shall signify his approval of the aforementioned connection permit by final signature on the permit.
- 5.03 At the time of inspection of the connection, the owner or owners of properties shall permit the Inspector full and complete access to all sanitary and drainage arrangements and facilities in each building and in and about all parts of the property. No building sewer line shall be covered over, or in any manner concealed, until after it is inspected and approved by said Inspector.
- 5.04 It is the intention of these Rules and Regulations that the entire connection be inspected at one time; however, if the property owner or Authority inspector feels that special conditions warrant more than one inspection, he may request the same, subject to such additional inspection fees as the Authority shall determine.
- 5.05 Whenever, in the opinion of the engineer or other duly authorized representative of the Authority, special conditions require additional safeguards or more stringent specifications to be observed, then, and in that event notwithstanding any other provision of this Resolution or requirements of the Township Plumbing Code, the Authority specifically reserves the right to refuse to permit a connection to be made to its sewer system until such special requirements or specifications, as may be stipulated by the Authority or its Engineer, have been satisfied.
- 5.06 Inspections will be visual and will also require the use of air or water to determine the water tightness of the lateral.
- 5.07 For the purpose of enforcing the Rules and Regulations of the Authority with respect to the operation of the sewer system, and for the purpose of advancing and protecting the public health, the Authority reserves the right to enter upon the premises of any person, firm or corporation connected to the system for the purpose of inspecting the sewer facilities located therein and for the purpose of determining compliance with the requirements of the Authority. In the event that the

Authority's duly authorized representatives are denied access to any customer's premises for these purposes, the Authority reserves the right to discontinue sewer service to such premises until inspection is permitted and compliance with the requirements of the Authority has been determined.
